

Munich, October 2020

What if you could save the world?

Join act renewable, and help drive the corporate renewable transition, by supporting multinational corporations' transition to renewable energy in Vietnam and South East Asia.

Are you interested in working with international corporates and their carbon emission reduction strategies, advising international and local clients on how to transition to renewable energy in Vietnam and SE Asia? This exciting opportunity with renewable strategy advisor act renewable GmbH, might be right for you!

Position:

Project Manager, renewable energy transition, Vietnam.

Who we are:

act renewable GmbH is an independent international strategic renewable energy advisory, headquartered in Munich, Germany. We have an ambition to accelerate and simplify the path to zero-carbon emission for multi-national corporates.

We support corporate brands and their suppliers around the world and have for the past years been advising clients in South-East Asia and Vietnam.

We are engaged with large brands within apparel & sports-wear, hygiene/pharma, financial services as well as industrial manufacturing.

We are a joint venture between renewable energy developer BayWa r.e. renewable energy and environmental consulting firm RESET Carbon. By combining BayWa r.e.'s technical expertise with RESET Carbon's corporate consulting insights, we offer business solutions for every stage of the corporate renewable energy transition.

What are we looking for:

We are looking to expand our team in Asia with a technical minded profile who can support existing projects and develop new opportunities in Vietnam as well as support our colleagues in Asia and Europe.

We are looking for a colleague with technical insights into renewable technology systems and products and their application in Vietnam and the South East Asian region.

The ability to simply complex solution to non-technical clients is key, as well the ability to balance multiple different types of tasks at the same time.

Flawless execution, delivering value adding analysis and recommendation to our clients to base their decision making on, is the core of our business. Therefore, we need a well organised person with solid project management skills and analytical capabilities, who understand the corporate world and their approach to renewable energy.

Who are you:

As act renewable is a young and dynamic company with both clients and partners around the world, we are expecting a dynamic and flexible person, who are able to deal with many different and fast changing tasks, and at the same time deliver a focused and high quality services to our clients, in collaboration with the wider team.

We expect you to be technically minded result oriented, ambitious, service minded and motivated by working in an international and culturally diverse company with clear target to serve international clients at the highest level.

What we can offer:

- *A job with a clear purpose, focusing on solving one of the most important and critical challenges the modern world is facing - carbon emission.*
- *An international work environment with a large network of contacts, clients and cooperation's, all over the world.*
- *A dynamic and varied work day, with multiple types of tasks and opportunities to develop new skill sets.*
- *Direct reference to the managing director*
- *The opportunity to influence and develop a new and evolving international advisory business in Vietnam and the South East Asian region*

Facts about the position:
